DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art searched and cited failed to teach or fairly suggest a high frequency infrared radiation source having a hermetically sealed chamber with a plasma generating gas therein; a pair of spaced electrodes in the chamber for creating a plasma there between; and a collimating lens made of infrared radiation transmissive material disposed between the pair of electrodes and the window in combination with the remaining elements of claim 1. Claims 2-23 are allowable because of their dependencies upon claim 1. The prior art searched and cited failed to teach or fairly suggest a high frequency infrared radiation source having a header; a pair of spaced electrodes supported above the header; a can sealed with respect to the header creating a sealed chamber; a gas in the chamber which creates a plasma between the electrodes; and an optical path from the plasma through the window including only materials which transmit infrared radiation in combination with the remaining elements of claim 24. Claims 25-34 are allowable because of their dependencies upon claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
